

# FRAMELESS

The black circle shows a round bead inserted in the hem of the banner. You can also use rope if you can't get your hands on this bead.

This self tapping bolt pulls the banner around the back of the frame. The cool thing is that with self tapping screws, if you mess up a hole, you can just make a new one next to it.

The all knowing Banner (you can use any material in this frame)

Mount the frame to the wall once. No more drilling holes when you change out banners.

- Tension any size banner, anywhere!
- A super clean look
- No visible hardware
- Huge, wrinkle free banners
- Regular change outs
- Easy installation on Stucco
- Indoor or outdoor
- Works best with outdoor banner vinyl
